S-2312/AP-2E

SUBJECT: Request for Updating of National Intelligence Estimate
10-58, "Anti-Communist Resistance Potential in the
Sino-Soviet Bloc" (C)

TO: Chairman, United States Intelligence Board
Central Intelligence Agency
Washington, D. C. 20505

1. (S) The Defense Intelligence Agency, in order to satisfy the requirements levied upon it, has a pressing need for a current study of anti-Communist resistance potential in the Communist World. For a variety of reasons, the study must have the stature, impact, and distribution of a national intelligence estimate.
2. (S) NIE 10-58 was prepared in the era prior to the Sino-Soviet split. It is now felt that two national estimates should be prepared; one dealing with the USSR and Eastern Europe, the other with the Asian Communists.
3. (S) In view of the need for such estimates, and the exceptionally long time since NIE 10-58 was issued, it is requested that the new estimates be prepared early in 1966, at the latest.
